Our Company Commitment

NATIONAL MOLDING LLC is committed to a vision of total customer satisfaction offering quality, responsiveness and inventiveness considered best in a world market. We must dedicate ourselves to dynamic, ongoing innovation in both product design and manufacturing progress. We must instill within all our people a sense of urgency, commitment, and ownership with the understanding that every person can make a difference by making suggestions which serve to continuously improve our product. Each person within our organization has made an unwavering, uncompromising commitment to the highest standards of quality and service with the understanding that we, as a supplier, have been entrusted by our customers to provide a product on time, at a reasonable price and with perfect adherence to the specifications as provided to us.

Materials

Dealing with material suppliers as frequently as we do, we often wish that a set material could be specified as being the ideal candidate for certain applications. Unfortunately, what is considered "ideal" is often elusive. Consequently, we cannot over emphasize the need for our customers to thoroughly test the varieties we have to offer, in the specific application for which they have intended the product to be used.

Acetal

You cannot beat this material for its stiffness and tensile strength and consequently people (especially in the US) prefer the "macho" feel in side release buckles. However, acetal's biggest strength lies in its ability to resist moisture through absorption and it consequently performs very well under freezing or arid conditions. The acetals we mold are Dupont's Delrin. Be careful, however, acetal's high stiffness can make it susceptible to impact.

Nylon

Nylon offers great impact resistance under normal operating conditions. It is light, flame retardant, and has a softer feel for side release buckles. When used on a typical single piece product it is not that unusual to obtain a 20%-30% increase in tensile strength over acetal. The kicker, of course, is that nylon absorbs water and under freezing conditions can become brittle. We mold Dupont and Solutia's Nylons.

DISCLAIMER

WARNING: PRODUCTS SHOWN IN THIS CATALOG ARE NOT FOR USE IN ANY PRODUCT INTENDED TO PROVIDE SAFETY OR PROTECTION TO ANY PERSON.

You must independently evaluate the suitability of each product, and test each product for their use in your application. National Molding LLC and its subsidiaries, affiliates, and licensees disclaim any liability resulting from buckle use. National Molding only obligations are those in our Standard Terms and Conditions of Sale and in no case will National Molding LLC be liable for any incidental, indirect, or consequential damages arising from the sale, resale, use, or misuse of its products.

	(thin web male only)

Tripoint Buckle

The Tripoint is our design solution for a three-point buckling system. The female has a connecting loop design to attach to a crotch strap. The two males are designed with strap adjusters to connect to the waist belts. The strap-adjusting bar on each male has a protective "anti-slip" fin which protects the webbing from completely slipping off the buckle. The unique central push button simultaneously disengages both male buckles when pushed, offering tremendous convenience when looking to release your child.

SIZE	NYLON
	MALE FEMALE
1"(25mm)	6301 / 6302

Weinerlock® Dog Collar Buckle

Roll over Fido! Our ultra-strong, highly-stylized curved version of our Stealth® offers extra strength.

Pull-Tite® Cord Lock with Contoured Spring Button

Our Pull-Tite Cord Lock offers a "no slip" cord-pinching system, actively based by an all-plastic spring. This product is ideal for those cord-cinching applications that absolutely want the strongest locking action out there. Ideal for 1/8" to 3/16" cord.

SIZE	ACETAL	NYLON
1/8" - 3/16"	7182	4044 - HOUSING

Pop-Lock Cord Lock

We can only describe this as a side release cord lock. The parts come preloaded with the hole in alignment, which makes it significantly easier for factory operators to install the cord locks onto garments, sleeping bags or backpacks. By simply squeezing the sides after the cord has been passed through the holes, the locking mechanism, springs up, pinching the cord. The all-stainless steel spring offers a 30% stronger lock than other competitive versions and although the Pop-Lock® is compact in size, it affords a larger opening to accommodate larger cords.

Accommodates these:		ACETAL

Groovy Zipper Pull

We have expanded our positive-locking, pinching zipper pull cord end into a highly “grooved” design. Compact, yet strong, the new Groovy Zipper Pull works ideally with both flat and 1/8 inch diameter cords and also bungee cord.

ACETAL
6967 *CORD NOT INCLUDED

Posi-Grip Zipper Pull

We have incorporated a positive “cam pinching” system into a “zipper pull” end piece, which locks securely on 1/8” diameter bungee/braided cord or 1/4” flat cord.

COLOR BLACK
ACETAL 6884 *CORD NOT INCLUDED

Zip Clips

This design eliminates the metal to provide a silent pull tab that is easy to grab, even with gloves or mittens.

Ideally suited for a 2.5mm cord.

ACETAL
Outer Sheath 5938
Inner Insert 5939

*CORD NOT INCLUDED

Stave Cap

Designed to shield the rough edges of cut aluminum back staves. Fits 1” x1/8” aluminum.

ELASTOMERIC
5569

Quik Clamp Suspender Divider

Our open “Clam Shell” design is the quickest way of applying a Strap Divider to Suspenders. Ultra thin and available with a large area to add logos on the tool. Utilizing strap dividers offers a major advantage over sewing permanently the criss-cross. The Quik Clamp Suspender Divider allows the webbing to float with a certain degree of friction, which permits the criss-cross to center freely relative to the shoulder width of the specific person using the product.

SIZE POLYPROPYLENE
6314

Works with one 1-¼” and 1-½”

Single Zip Clip End

Similar to the Zipper Pull, this design has an added decorative cord end for hood adjustment systems. Ideally suited for a 3mm cord.

ACETAL
Outer Sheath 7335
Inner Insert 7334

*CORD NOT INCLUDED

MOD-U-LUX® Sternum Strap System

An ideal system combines simplicity with modularity. We have incorporated a “quick change” snap-in receptacle into a Sternum Strap Adjuster that can receive a swiveling D-ring, a light holder, or a hydration tube holder.

The hexagonal mount allows rotation to eight(8) different fixed positions.

The slotted outside bars allow easy mounting to a base unit along the shoulder harness. The base unit has two(2) different web widths to accommodate either 1 inch or 3/4 inch webbing.

Mod U Lox Pouch Attachment System

Developed in Italy, this highly stable professional-looking sewable system provides for a quick "slide in - slide out" pouch attachment. The oval sewable base unit doubles as a decorative lashtab.

NYLON
7300 Sewable Oval
7299 Sewable Latching Plate

Buddy-Lok® Pouch Attachment System

One of the most requested products we have been asked to develop is a modular pouch attachment system that is simple to use. The Buddy-Lok system is simple, easy to use and has a cross-functional use as a simple lashtab. Ideal for transferring water bottle holders from the waist belt of a backpack to the waist belt of the removable lid/fanny pack.

NYLON
6456
6457

Buddy-Lok Light Clip

For all those widget meisters, we have developed a flashlight or walking stick holder, which attaches onto our Buddy-Lok® system. The Buddy-Lok® pad can actually be mounted onto a shoulder pad or sewn directly onto a bag. The light attachment unit assembles simply by inserting the bayonet into the center hole of our Buddy-Lok® lashtab and turning 90 degrees.

ACETAL
6549

Double Buddy-Lok® System

For larger pouches, we developed the Double Buddy-Lok® system, which offers two (2) fixation points for stability. The neat aspect of this design is that the actual lashtab is used as a standard lashtab, which is sewn directly to the backpack and also can be converted to a double-swivelling bayonet and paddle component via an easy snap together design.

Quik Disconnect Suspender Clips

We have developed a low profile sewable stud that serves as an attachment point for a unique easy-to-assemble suspender clip. Once installed, the clips will break away at about 10 lbs., which offers the added feature of providing a safety in case suspenders get caught into machinery. Because the clip swivels in relation to the sewable stud, the clip will naturally swivel to match the appropriate angle of the criss-cross of the suspender, preventing any "bunching" on the fabric or elastic.

Molly Stix

Here is an ingenious method for attaching pouches, pockets and other items to PALS webbing. Molly Stix are easily woven between the webbing and locked in place securing and stabilizing the accessory onto the pack or armor. To remove the item a quick flip of the locking tab and the item is free in a few seconds. Two or more can be linked together with para-cord and released in unison. Patent Pending.

"J" Hooks

The "J" HOOK a unique way to attach shock cord or paracord to MOLLE. The hook is designed to engage a standard bar tack and will maintain it's position regardless of any tension on the cord. The 'J' HOOK can be removed or repositioned easily and under extreme load will snap free without breaking. This item allows for interchangeable and replaceable cordage on magazine pouches and other accessories. These are available in black and all of our standard military colors. Another great idea from National Molding in our continued effort to "Go Beyond the Buckle".

10215

Our new fully integrated, competitively priced quick release and easy to assemble Quad Re-lease System is a major improvement to the systems now being used on Tactical Vests. Each buckle works as a standard side release buckle and offers simple size adjustment. Re-lease each buckle individually or all 4 buckles simultaneously. The buckle/fixed cable assembly offers flexibility for various design requirements. Each component is designed to be field repairable with incomparable ease of assembly.

Foliage Green 504 (Code IRG) and Tan 499 (Code TN499) are actual materials molded in our US owned and operated Small Business classified facilities.
